Junior Software Engineer

Computer Science graduate with strong interest in backend systems, databases, and enterprise application development. Experienced in building backend services using Java and Python with solid understanding of OOP principles, SQL databases, and system design fundamentals. Comfortable working in Linux environments and passionate about translating business requirements into technical solutions. Seeking to contribute to enterprise systems development and workflow automation.

SKILLS

- **Programming Languages:** Java, TypeScript, JavaScript, Python, C++, c#
- **Backend Development:** Spring Boot, Express.js, REST APIs, JWT Authentication, .Net
- **Databases:** PostgreSQL, ClickHouse, SQL, Database Design, Query Optimization
- **Tools & Infrastructure:** Docker, Git, Linux, Apache Kafka, postman
- **Frontend:** React, Tailwind CSS
- **Computer Science Fundamentals:** Data Structures & Algorithms
- **Languages:** Arabic (Native), English (Professional)

PROJECTS

Real-Time Distributed Analytics System (Graduation Project)

- Role: Backend Engineer (Team of 3)
- Tech: Kafka, Spring Boot, ClickHouse, Docker
- Contributed to building a real-time data pipeline processing 10,000+ events per minute
- Developed REST APIs using Spring Boot
- Designed ClickHouse schemas, improving query performance by 40%
- Collaborated on system design and integrated backend services
- Github: <https://github.com/salahqr/Real-Time-Distributed-Analytics-Dashboard-Project>

E-commerce Backend API (Personal Project)

Tech: TypeScript, Express.js, PostgreSQL, Redis, Docker

- Built a scalable backend system simulating real-world business operations (users, orders, payments)
- Developed 40+ REST APIs including authentication, role-based access control, and order workflows
- Designed and optimized relational database schema using PostgreSQL
- Implemented caching using Redis to improve performance (~50% reduction in load time)
- Integrated secure payment workflow using Stripe webhooks

EDUCATION

Bachelor of Science in Computer Science

Al al-Bayt University — Mafrqa, Jordan
